ACTA SEISMOLOGICA SINICA Vol.3 (1990)

CONTENTS

No.1

Stereoscopic Pattern of Time-variation in the Space Distribution of Foci of the Xingtai Earthquakes And Their Occurrence Procedure……*Hu Xiaoxing and Lin Banghui* (1)

The Effects of Single And Multipe Scattering on Coda Waves for Local Earthquakes……*Zeng Jian and Nie Yongan* (14)

A Ground Motion Attenuation Model Considering the Rupture Direction of Seismic Source……*Liu Hanxing, Wang Suyun and Shi Zhenliang* (26)

On the Systematic Deviation of Seismic Intensity Attenuation Models……*Shen Jianwen and Hua Yiping* (43)

The Juxian Geosound Network and A Geosound Data Processing System……*Xu Yonglin, Shen Ping and Zheng Zhizhen* (53)

Ground Fissures And Modern Seismicity in Fenwei Region……*Wang Jingming and Chang Pixing* (66)

Real-time Seismic Wave Data Compression Methods……*Guo Hongsheng and Chen Junliang* (79)

SSQ-II Biaxial Bubble Tiltmeter And Harmonic Analysis……*Dai Bangwen* (93)

[ A Review]

Monitoring And Research on the Behaviour of Underground Water And Its Relation with Earthquakes in China……*Wang Tiecheng and Che Yongtai* (104)

[ Research Notes]

Experimental Observations on the Changes of Apparent Resistivity With Time in the Range of Focal Depth And Its Relation to the Occurrence of Earthquakes……*Zhang Yunlin, Si Yulan, Guo Shounian and An Haijing* (115)

A Method for Testing Crustal Stress Measurements And the Observations Before Two Earthquakes……*Kang Zhongyuan, Yang Xiuxin, Wang Tingyun, Ren Qingwei, Zeng Xiangtong and Jiang Rongfa* (123)

* * *

Catalogue of Earthquakes (March to May, 1989)…… (130)

No. 2

Distribution of Earthquakes, Figuration of the Benioff Zone And Stress State in the Ryukyu Island Arc……*Zang Shaoxian, Ning Jieyuan, and Xu Lizhong* (137)

The Synthetic Judgement for Seismic Activity……*Gu Jinping, Yu Xuejun and Qian Jiadong* (149)

Source Parameters of the South Yellow Sea Earthquake of May 21, 1984— Determination of Source Parameters for a Very Shallow Earthquake With IDA Records……*Wang Lingnan, Zhao Zhiguang, Wang Zhongliang and D. Agnew* (157)

*In Situ* Stress, *In Situ* Strength of Rocks And the China Mainland Stress Field……*Chen Jiageng and Gao Longsheng* (170)

Direct Measurement of Stick-Slip Displacement And Estimation of Shear Fracture Energy……*Shi Xingjue and Wang Qiyun* (182)

Lithospheric Structure in the Tibet-Japan Profile……*Sun Kezhong, Feng Rui, Yao Zhengsheng and Zhou Hainan* (190)

The Δ-ξ Transform in Seismic Tomography……*Wu Lijun and Feng Rui* (199)

An Experimental Study on the Isoseismal Line of the Hua Xian Great Earthquake……*Wu Fuchun, Xu Junqi and Zhao Xuanli* (212)

Social And Economic Responses to Earthquake Prediction And Countermeasures Against the Prediction Issuance……*Zou Qijia and Zhang Shaoquan* (223)

**[Research Notes]**

Fuzzy Cluster Analysis of Composite Fault Plane Solutions of Small Earthquakes Occurring in North China……*Jin Yamin, Yu Xinchang and Jiang Chunhua* (232)

On the Inversion Problem for a Discontinuous Travel-Time Curve ……*Wu Mingxi* (240)

**[Discussion]**

Comment of "Possible Anomalous Changes of Geomagnetic Transfer Functions at Heze Station Related to the *M*5.9 Heze Earthquake of Nov. 7, 1983"……*Chen Po-Fang* (246)

**[Brief News]**

The Establishment of China's Antarctic Seismological And Geomagnetic Observatories……*Lin Yunfang and Jia Guoqiang* (248)

* * *

Catalogue of Earthquakes (June to August, 1989)……(256)

No. 3

A Study of Background Seismicity of the Strong Earthquakes in North China ..... *Zhang Huailu* (259)

Fuzzy Synthetic Recognition of Medium-Short-Term Earthquake Precursors..... *Feng Deyi, Wu Guoyou, Masaji Ichikawa, Zheng Ximing and Hidemi Ito* (275)

The Fractal Dimension Characteristics of Seismic Activities Before And After Large Earthquakes..... *An Zhenwen, Wang Linying and Zhu Chuanzhen* (293)

Empirical Point-Ellipse Model for Seismic Hazard Analysis..... *Shen Jianwen, Hua Yiping and Qiu Ying* (303)

The Difference in Group Velocities of Rayleigh Waves Between Ends of the NS Seismic Belt of China And That Between Its Both Sides And Implications in Tectonics..... *Li Baiji, Li Ning and Chen Hong* (315)

Determination of Focal Mechanism Using SH to P Amplitude Ratio..... *Francis T. Wu, Wang Peide and Chen Yuntai* (325)

A Study of the Focal Process of the Heze Earthquake ( $M_S$ = 5.9) of November 7, 1983..... *Liu Wanqin, Wei Guangxing and Zhou Cuiying* (335)

An Echelon Fracture Model for the Tangshan Earthquake Sequence as Well as Simulation in Theory And Experiment..... *Zhang Zhili, Wang Chengbao, Yan Hong and Fang Xing* (347)

Comparative Measurements of Magnetic Fabric Using Kappa Bridges And Miniseps..... *Xu Tongchun, Liu Xiuming and Yan Hong* (363)

A Study of the Geoelectric Effects in the Process of Hydraulic Fracturing Experiments..... *Chen Baohua, Shi Linhua and Luo Yongmiao* (371)

The Characteristics of Seismic Damage And Analysis of the Earthquake Generating Tectonic Structure of the 1605 Great Earthquake of Qiongzhou, Hainan Island..... *Chen Enmin and Huang Yongyin* (383)

* * *

Catalogue of Earthquakes (September to November, 1989)..... (403)

No. 4

Scaling Law From Two-Dimensional Faulting Model..... *Chen Peishan and Chen Haitong* (405)

Factors Influencing the Estimation of *b* Value And the Selection of *b* Value in Hazard Analsysis..... *Huang Weiqiong, Shi Zhenliang and Cao Xuefeng* (421)

Segmentation And Geometric Features of Xianshuihe Holecene Fault Zone And Their Seismotectonic Implication……
*Wen Xueze, C. R. Allen, Luo Zhuoli, Qian Hong, Zhou Huawei and Huang Weisi* (437)
Investigation of Geoelectromagnetic Induction Function for Three-Dimensional Structures…… *Kao Wen* (453)
The Effect of Stress on Remanent Magnetization of Rocks……*Hao Jinqi, Huang Pingzhang, Zhang Tianzhong, Xu Mingfa, Zhou Jianguo and Ma Xinghua* (465)
The Observation Research And Analysis of Underground Water Tide in China…
…… *Zhang Zhaodong, Wang Baoyin, Gao Yubin and Wang Changwen* (477)
Anomalous Behavior of Radon Emanation And Microfracturing Characteristics of Rock Under Action of Ultrasound……
……*Feng Wei, Yang Shutian and Wang Gengzhou* (491)
The Quantitative Elimination of Non-Random Interference on Groundwater Radon Data …… *Liu Yaowei* (505)
*In Situ* Investigation of Frictional Characteristics of Rocks And Gouge With Large Scale Test Blocks……*Xu Dongjun and Geng Naiguang* (521)

**[Research Note]**

An Experimental System for Rock Triaxial Creep at High Temperature And High Pressure (With Solid Medium for Confining Pressure)……
……*Wang Zichao and Wang Wei* (531)

* * *

Catalogue of Earthquakes (December, 1989 to February, 1990)…… (539)
